PROJECTS AND EXPERIENCES

Braskit Company Website – Paid Project – 02/2026
- I developed a landing page focused on modernity and compatibility with the company's current web server.
- The current rules of the Brazilian LGPD (Brazilian General Data Protection Law) were taken into consideration in the implementation of the project.
- A guided chatbot system was created to help users resolve simple issues before contacting the company's technical support.
- Thanks to this chatbot system, the number of customers seeking support from the company has decreased drastically, resulting in greater efficiency and agility for the company.

Technologies: HTML, CSS, Javascript, SEO, Git, GitHub
Project: Website

Social Basket System (Volunteer) – Project for managing basic food baskets for an NGO – 10/2024 until 02/2025
- I developed a system for managing and controlling employees, beneficiaries, volunteers, and the delivery of basic food baskets.
- Due to the need to manage what is received and delivered, a system was created to register all the people who would receive, manage, and deliver the basic food baskets.
- Volunteers who assist with deliveries and teach courses provided by the institution are also registered on the platform, allowing for faster and more efficient access to volunteer data.
- Thanks to this system, processes are more transparent and secure, generating greater efficiency and agility in operations.

Technologies: PHP, MySQL, HTML, CSS, Javascript DOM, Bulma CSS Framework, External API Consumption
Project: Linkedin Project

Salesforce Developer (Contractor) – K2 Partnering – 09/2024 until 12/2024
- I developed and optimized Triggers and Salesforce Flows to automate complex processes.
- I participated in the migration of Aura components to Lightning Web Components, improving performance and optimizing code maintenance, reducing the response time of critical interfaces by 30%.
- I participated in the complete integration between Microsoft Dynamics and Salesforce, enabling real-time data synchronization and improving information accessibility for sales and support areas.
- I developed and implemented RESTful integrations to connect external systems to Salesforce, ensuring a secure and efficient flow of data between platforms and increasing interoperability between teams by 20%.

Technologies: Salesforce, APEX, LWC, Aura, API Rest, Git, Jira

Raphael Portfolio – Paid Project – 10/2024
- Paid work to create a professional portfolio for Mr. Raphael, for anyone who wants to inquire about his professional qualities, presenting him as a qualified professional.

Technologies: HTML, CSS, Javascript DOM, Bootstrap, Jquery
Project: Website

File Opener – Paid Project – 09/2024
- Paid work to create a Java program to launch executable files, adjusting the order and delay for each executable as specified.
- The result was greater system availability, as there are constant power outages in the area for extended periods during the hours when the company is closed and there are no employees to restart the system, since it needs to be opened in a specific order.

Technologies: Java
Project: Linkedin Project

Computer Technician – Braskit Comércio de Componentes Eletrônicos LTDA – 10/2008 until 07/2024
- Installation and maintenance of computers, networks, electronic security equipment (NVR, DVR, Alarms, Access Controls, Digital Cameras, Wifi, Gate Automation, Projectors, Sound Systems) etc.
- Design and development of projects for networks, electronic security, and automation.
- Manager of the company's website and digital marketing investments.
- Provided technical support (after-sales service) to the company's clients, resolving problems remotely to avoid the need to return to the client's residence.
- Instructor of new and old technologies for everyone in the company.

Technologies: Intelbras systems, Hikvision, Ubiquiti, Omada, Microsft Office.
